Comment : I feel that the morse code testing should be eliminated from all aspects of Amateur Radio Testing as this is old technology that is no longer used within other branches of the Government and many other countries. Attracting newer/younger hams is of great importance to further the development of Amateur Communications for purposes of Emergency Communications as shown during major disasters over the course of recent history. Infrastructure is great when it works, but when Infrastructure is interrupted, Ham Radio always pulls through in time of need.

Abolish the code for all levels of licensing and lets develop new technologies that can assist people in their time of need.

Thank you for your consideration.
